

HARDIK PRAJAPATI

FLUTTER FULL-STACK MOBILE APP DEVELOPER | IOS DEVELOPER

Harij, Patan, Gujarat • +91 7487094036 • hardikprajapati8097@gmail.com • hardikprajapati.site

PROFESSIONAL SUMMARY

Flutter-focused full-stack mobile developer with hands-on experience delivering end-to-end applications using **Flutter, Dart, Firebase, and Python FastAPI**. Experienced in product design, UI implementation, REST API integration, authentication, admin panels, testing, and production-oriented mobile workflows. Built and maintained real-world applications for LIC Development Officers and agents, with experience across Android and iOS development. Currently pursuing M.Sc. IT, expected June 2028.

PROFESSIONAL EXPERIENCE

Full-Stack Flutter Developer Intern

PadosiAgent Serv Tech Ltd. | Ahmedabad, Gujarat

15 May - 15 August

- Completed a 3-month internship focused on mobile application development using Flutter and Dart.
- Developed features for an LIC-agent application used to manage leads and update/edit agent profiles.
- Integrated Python FastAPI REST APIs with Flutter for application data exchange and backend communication.
- Worked with Firebase services and authentication as part of the application stack.
- Handled feature implementation, UI development, API integration, debugging, and application testing across the development lifecycle.
- Internship certificate available.

SELECTED PROJECTS

Development Officers App

Closed Testing

Mobile Application - Recruitment & Agent Management

- End-to-end Flutter application built for Development Officers to manage recruitment activities and their agents.
- Designed and implemented the complete application, including UI/UX, Flutter/Dart development, Firebase integration, testing, and release workflow.
- Built and configured a comprehensive Admin Panel covering recruitment and administrative management requirements.
- Integrated Firebase services across the product, including Firebase Authentication.
- Currently available through Google Play closed testing; independently handled design, implementation, integration, and testing.

LIC Community App

In Development

Mobile Application - Development Officer Community

- Community-focused Flutter application designed to help LIC Development Officers interact, connect, and build a professional network.
- Developed using Flutter, Dart, and Firebase with a focus on scalable mobile workflows and a clean user experience.

FREELANCE DEVELOPMENT

Freelance Developer

Project-based

Web Application Development

- Delivered freelance web development work using React and Python, including application development and feature implementation.
